

MOTHER EARTHS DECLARATION

1.§ This declaration is the first and only document to recognise Mother Earth as a living, intelligent and spiritual being, who requires, proper legal status, juridical definition and representation, in all nations, governments and human populations. Thus the name and concept Gaia, and other nations cultural names and concepts, shall be adopted by this declaration and deem legal, with the support of you the people.

2.§ This planet provides materially, for you and all humanity, all basic needs, for a comfortable life style, for the entirety of every humans life time existence. At least three generations before you were born, mother life was expecting you, as she does with all humanity, thus she is the mother of all living, newborn and unborn and all she seeks, of humanity, is that we recognise and legally call her Mother Earth. Mother Earth declares she desires the presence of human love.

3.§ Mother Earth appeals, to you, humanity, to be more conscious of Gods love in all the ever changing nature surrounding you. Gods love is the only element and condition for the spark of life, the life force and the existence of the spirit within all creation. It is important to give thanks every day to God if you are thankful for your life. It would seem humanity departs further and further from God, love, spirit and life, because humans want to become the creator of life, but miss the true understanding and knowledge of love.

4.§ Mother Earth declares that she no longer accepts the way that you, humanity cause war, with each other and many diverse life forms of her creation. Such suffering and death are unnatural scars on her landscapes, which never heal. It has been said by many wise teachers that, (you shall love one another as you love yourself) and still we do not hear the simple message of peace and love. If you humanity let this simple message enter your hearts, then you, every person will know the presence of her sacred beauty of life, love and peace.

5.§ Mother Earth, seeks of you humanity, to acknowledge all she gives you. Mother Earth, has never asked you to pay for anything, until now and all she is asking as payment, is that you remember to give thanks and love to her every day by simply saying, good morning, good loving good living Mother Earth. If every human being did this simple task every day, for one year, the whole situation of global warming will heal.

6.§ Mother Earth declares that, you humanity, use square, linear, circular, shapes and designs in your way of thinking. Such thoughts patterns are a stress factor, to the natural ecological patterns of Mother Earth, because these patterns separate and eventually stop the natural flow of life. Mother Earth challenges, you humanity to learn to follow the designs of her nature. Human pollution is not the result of what we use or do, it is mostly, caused by how we think.

7.§ Mother Earth appeals to, you, every human being, why do you act disrespectful to your life force, such as when you are unable to share the fruit and food of the land and waters, with each other and when you do not give thanks to the life force that had to die to feed you. Why do you let your fellow brothers and sisters die of starvation or thirst and sickness when there is enough food for all. Be sure there is enough food to feed all humanity, but there is only death and starvation when you try to feed greed. Learn the practice of generosity and teach it to your children and give thanks. Keep the one most sacred law of love, feed the people with food, prepared with love, and be blessed with the happiness of life.

MOTHER EARTHS DECLARATION

8.§ Mother Earth declares that all creation, on or in the layers of her land and mountain teranges and surfaces, in her ocean waters, lakes and all fresh waters, up in the layers of her atmosphere, hold the precious gifts of her life force and memory. She knows every life and death movement of her creation, no matter how small or large, she records the change. When vast amounts or numbers of death occurs, it changes the balance of nature, and this is a clear indication to you, humanity about how fragile the balance and harmony of nature is.

Learn to respect and give reverence to all presence of life because it is so fragile.

9.§ Mother Earth appeals to all nations and governments, to consider that all cities, villages, and towns, create a special Mother Earth place of beauty, in the mountains by water fountains, water sources, brooks, streams, rivers, lakes, public beaches, forest, to help bring balance and harmony back her life force. Mother Earth states, that you humanity have divided her lands and waters without any consideration of any place for her spirit. Her forests, soils, minerals, sea are bought and sold and exploited by the human greed virus which results in causing deep physical wounds to her life force.

10.§ Mother Earth declares to you, humanity, that because of her love to humanity, this is the only power that stops her from destroying all humanity. It is time for you humanity to change the way you think and act, and seek happiness and love in the simple nature of life. There is too much stress and anger in the daily living styles of many people and this is then expressed in the way people drive, work, eat drink and play, so this is the real pollution. How can Mother Earth clean the pollution of human stress and anger, or fear, hate, greed, jealousy, unhappiness, loneliness, shame, arrogance, ignorance, tyranny, loneliness. Mother Earth assures that she is within every human being. Humanity is a part of her life force, she waited for you, long before you were born and she will remember you long after you have gone. Love and happiness is the true essence of humanity.

11.§ First nations people have a clear understanding and concept of Mother Earth in their cultures .Some nations still practice traditional practices to honour and pray to Mother Earth, but such possibilities have declined and become less and less, because first nations peoples have been robbed of their traditional lands and waters. Many first nations peoples minds and time are occupied by the detrimental influences of modern day culture, thus the prayers and ceremonies have been replaced or forgotten. To change these tendencies the only option for the people is the return of their traditional lands and waters in full.

12.§ Mother Earth appeals to all nations, governments and wealthy multi-international business companies, to annually, financially sustain all organisations, groups and individuals who work for Mother Earth, and the seven elements of creation, (especially any scientific research that studies the spiritual, and love factor), who can produce clear evidence of their work, as this will become the biggest concern for the future of all business. It is as equally important that the same support be given to all individuals, groups and organisations, who display an expression of the spirit and love of Mother Earth and the seven elements of creation. The arts act as a safety ventilation for all cultures and societies and express energetically the climate of the population. All expressions of the arts have the possibility to be able to act as a more direct dialog between human beings and Mother Earth. This creates threads of thought and sound. From such an arrangement, it is then possible to weave a mantle that will cover and connect Mother Earth, humanity and all creation.

13.§ Mother Earth warns you, humanity to change your way of living now, if you want to live with the beauty that you see around you . How you live now, decides the future of ten generations of all creation coming, especially humanity. It is the responsibility of you every human being to protect the future of the unborn creation and human children, by protecting Mother Earth.
